Oiling the 7 Series

Question: How often does the 7 Series need to be oiled?

Answer: We recommend the cleaning and lubrication process be performed at the beginning of each sewing day. Fill the red oiling port

port beneath the stitch plate, then fill both oil depots on the hook so that the felts are damp but not running over. Use Velocite No. 6, which comes in the oiling pen with the machine.

Specific steps are listed under Cleaning in the machine's Instruction Manual.
